Profile

As a full-stack developer with experience in Node.js, Express, React, and PostgreSQL, I am confident in my ability to make valuable contributions to your company. I possess the technical skills necessary to design and develop dynamic, user-friendly applications. My proficiency in Node.js and Express enables me to create robust and scalable back-end systems, while my skills in React allows me to design and develop responsive front-end interfaces. I also have experience working with PostgreSQL, ensuring that applications are fast and reliable. Along with my technical skills, I possess communication and collaboration abilities, making me an effective team player. Overall I am excited about the opportunity to bring my skills and passion for development to your team and make a positive impact on your business.

Skills

- Node, Javascript, React
- PostgreSQL, Express

Education

Fullstack Academy ⧉   01/2023 – 04/2023

- Completed an immersive, 4-month full-stack coding bootcamp focused on practical, hands-on learning in Node.js, Express, React, and DocumentDB.
- Developed proficiency in building scalable back-end systems, designing and developing responsive front-end interfaces, and managing database design and implementation.
- Received training in agile development methodologies, testing and debugging techniques, and version control tools like Git.
- Gained valuable experience working on cross-functional teams

Projects

Stranger's Things, *Craigslist Clone* ⧉
Developed a clone of Craigslist with custom logic that connects to an API, enabling users to register, login, create new posts, and message other users about items they have posted for sale. Designed a responsive front-end interface using React, allowing users to browse and search for items across the site.

Mumblr, *Tumblr Clone* ⧉
Mumblr is a personal project that a partner and I developed using React and PostgreSQL to create a web application that mimics the functionality of Tumblr. The application allows users to create and manage their own personal blogs, share content such as text, and interact with other users by liking and reblogging their posts. The project challenged me to develop my skills in front-end and back-end web development, including building a responsive user interface, implementing CRUD operations, and integrating a relational database. Overall, Mumblr demonstrates my proficiency in React and PostgreSQL, as well as my ability to create a complex full-stack web application.

Fitness Tracker ⧉
My Fitness Tracker is a web application built with React and PostgreSQL that enables users to create custom fitness routines by selecting from a variety of activities. Users can make custom workout routines by selecting from already made activities, or build new activities as well. With its intuitive user interface and powerful tracking features, My Fitness Tracker is a great tool for anyone looking to improve their fitness and stay on track with their workouts.

Professional Experience

Route Driver, *Imperial*   12/2022 – 01/2023
As a delivery driver, I provided exceptional customer service by   Oklahoma City
delivering products promptly and addressing any customer   Metropolitan Area
concerns or inquiries. In addition, I prioritized safety by conducting
regular inspections of company equipment, ensuring all necessary
maintenance and repairs were promptly addressed. I also
maintained accurate records of all financial transactions,
including collecting and dispensing money to equipment as
needed. My attention to detail and commitment to customer
satisfaction and safety contributed to the success of the company.

CDL Driver Merchandiser, *Swire Coca-Cola, USA*   12/2018 – 01/2021
As a skilled driver, I operated tractor trailers and box trucks   Bellevue,
ranging from 35 ft to 45 ft in length. My responsibilities included   Washington, United
delivering products to various accounts on a daily basis,   States
restocking coolers, rotating inventory, and setting up displays. I
proficiently operated electric pallet jacks and cool lifts while
prioritizing safety and adhering to DOT regulations.

Beverage install, *Great Plains Coca-Cola*   02/2016 – 09/2018
As an install technician my job was to install, remove and replace   Oklahoma City
Coca-Cola machines. These machines included vending machines,   Metropolitan Area
fountains and
coolers. I would also perform "resets" at accounts. Using a
planogram, I would
rearrange coolers in order to add new products and increase
visibility to more
popular products. I learned the importance of brand order and
how to set up
displays.
