WORK EXPERIENCE

Imperial   Oklahoma City, Oklahoma
Route sales   January 2022 - January 2023

- Developed strong customer service skills by providing prompt delivery, addressing customer concerns, and answering inquiries.
- Demonstrated attention to detail by conducting regular equipment inspections, ensuring proper maintenance and repairs, and accurately recording financial transactions.
- Prioritized safety by conducting regular equipment inspections, ensuring proper maintenance and repairs, and following established safety protocols.
- Contributed to the success of the company through a strong work ethic, commitment to customer satisfaction, and willingness to go above and beyond to ensure that deliveries were made on time and to the satisfaction of customers.

Swire Coca Cola   Bellevue, Washington
CDL Driver Merchandiser   December 2018 - December 2021

- Demonstrated strong logistics and organization skills by delivering products to various accounts on a daily basis, restocking coolers, rotating inventory, and setting up displays.
- Proficiently operated electric pallet jacks and cool lifts, demonstrating technical skills and ability to learn new tools and equipment.
- Managed time effectively to ensure timely delivery of products and efficient restocking of inventory, demonstrating strong time management and prioritization skills.

Great Plains Coca-Cola   Oklahoma City, Oklahoma
Beverage install   February 2016 - September 2018

- Demonstrated strong installation and maintenance skills by installing, removing, and replacing Coca-Cola machines including vending machines, fountains, and coolers.
- Utilized planograms to rearrange coolers in order to add new products and increase visibility to more popular products. Gained understanding of brand order and how to set up displays, developed skills in merchandising and marketing.

WEB DEVELOPMENT

OU Outreach College & Fullstack Academy   Oklahoma City, OK
Certificate of achievement Web development

SKILLS

Programming Languages: Javascript, React, Node, Express, Postgresql

PROJECTS

DrivEze Car Rental *React, PostgreSQL, Javascript, Express*   https://driveze.netlify.app/
This is my capstone project for my coding bootcamp called "DrivEze" - a mockup car rental website that allows users to browse a selection of vehicles that are available to rent. This is a full-stack application with all of the features you would expect to find on a e-commerce website. Through this project, I gained experience in full-stack development, UI design, and database management, working on a team and problem-solving.

Fitness Tracker *React, PostgreSQL, Javascript, Express*   https://fitnesstracker-application.netlify.app
My Fitness Tracker is a web application that enables users to create custom fitness routines by selecting from a variety of activities. Users can make custom workout routines by selecting from already made activities, or build new activities as well. With its intuitive user interface and powerful tracking features, My Fitness Tracker is a great tool for anyone looking to improve their fitness and stay on track with their workouts.

Stranger's Things *React, PostgreSQL, Javascript, Express*   https://strangersthings-marketplace.netlify.app
Developed a clone of Craigslist with custom logic that connects to an API, enabling users to register, login, create new posts, and message other users about items they have posted for sale. Designed a responsive front-end interface using React, allowing users to browse and search for items across the site.
